

You had a few of questions at ARC that we needed to research. Here are the questions and our responses:

?? What happens to student comments when you merge two SIDs?

☺ If the SIDs being merged have overlapping comment YRQs (both records have a comment for the same YRQ), then the comments for the correct SID are used. The incorrect SID comments go away. If the SIDs being merged have comment YRQs that do not overlap, then both comments are copied to the correct SID record.

?? Can anything be done with schedule planner so students can either enter common course IDs in the course ID field? Currently students have to select the course off the course list.

☺ The schedule planner was modified to handle this issue last summer. Your college just needs to download the new version of the Schedule Planner HTML forms from our web site:  
<http://www.cis.ctc.edu/wctc/webapps/SMSwebapps.htm#SchedPlanner> (Sorry that Julie and I forgot about this!)

?? We've heard that Tech Prep enrollments will be loaded into SMS through a process developed by WAOL and the State Board. Is this true?

☺ Actually, enrollments for a few courses are being uploaded into Blackboard (not SMS) using a process developed by WAOL. The enrollments will not be uploaded into SMS.

Let me know if you have any questions. Great to see you all at ARC!
